

Discover the difference

PlexPrime® SARS-CoV-2 Genotyping*

Research reagents to support investigation of COVID-19 variants of concern

Improve throughput and minimise hands-on time by reducing the number of reflex reactions required in your variant investigations.

Each **PlexPrime®** SARS-CoV-2 Genotyping* test allows for detection of multiple mutations linked to VOC in a single well using only a small amount of sample extract.

Increase laboratory productivity

- ▶ Streamline workflow
- ▶ Preserve valuable extract
- ▶ Have confidence in your results with superior technology

PlexPrime® SARS-CoV-2 Genotyping*	AVAILABLE NOW					COMING SOON	
	Alpha/Beta/Gamma+			P681R Delta	L452Q Lambda	L452R, E484Q Delta/Kappa
