| Catalogue Number:    | 2000301                                                                                                                                                  |
| Product Description: | Detection of <i>Mycoplasma genitalium</i> and 5 mutations in 23S rRNA on the BioRad CFX96™. This product is approved for <i>in vitro</i> diagnostic use. |
| Lot Number:          | 24020037                                                                                                                                                 |
| Manufacture Date:    | 2024-06-19                                                                                                                                               |
| Expiry Date:         | 2025-11-15                                                                                                                                               |
| Storage Conditions:  | -15°C to -25°C                                                                                                                                           |

# **Test method:**

**Resistance**Plus<sup>®</sup> MG<sub>(675)</sub> is tested with reference materials containing M. genitalium gene and 23S rRNA mutation sequences using the BioRad CFX96<sup>TM</sup> instrument with thermal cycling conditions stated in the IFU. The amplification data was analysed using the **Resistance**Plus<sup>®</sup> MG (CFX) software for the interpretation of M. genitalium presence and 23S rRNA mutation status.

#### **Results:**

| Toot Samples                                  | Specification                                           | Result |
|-----------------------------------------------|---------------------------------------------------------|--------|
| Test Samples                                  | Software Interpretation                                 |        |
| M. genitalium, 23S rRNA wild type - 20 copies | M. genitalium detected, 23S rRNA mutation not detected. | PASS   |
| M. genitalium, 23S rRNA A2059G - 20 copies    | M. genitalium,<br>23S rRNA mutation detected            | PASS   |
| M. genitalium, 23S rRNA A2059C - 30 copies    | M. genitalium,<br>23S rRNA mutation detected            | PASS   |
| M. genitalium, 23S rRNA A2058G - 24 copies    | M. genitalium,<br>23S rRNA mutation detected            | PASS   |
| M. genitalium, 23S rRNA A2058C - 20 copies    | M. genitalium,<br>23S rRNA mutation detected            | PASS   |
| M. genitalium, 23S rRNA A2058T - 20 copies    | M. genitalium,<br>23S rRNA mutation detected            | PASS   |
| Internal Control                              | M. genitalium not detected. IC valid                    | PASS   |
| No Template Control                           | Negative Control valid.                                 | PASS   |

The Finished products were tested according to standard Quality Control methods. The results were verified against the design specifications, acceptance criteria and reviewed and approved by the Quality Department.
